Professional Summary

Senior Integration Engineer with 4+ years of hands-on experience designing, securing, and exposing enterprise APIs using IBM API Connect (v10 and v2018) and DataPower Gateway. Proven track record delivering large-scale integration programs in the banking sector, including Open Banking implementations aligned with SAMA / Open Banking Lab standards. Skilled in OAuth2/OIDC flows, REST/SOAP service design, and full API lifecycle management from gateway policy authoring to CI/CD deployment on containerized platforms. Background in software engineering and native mobile development provides full-stack perspective on integration architecture.

Technical Skills

API Management: IBM API Connect (v10, v2018), DataPower Gateway, API Lifecycle Management, Gateway Policy Authoring, API Marketplace / Developer Portal

Integration & Protocols: REST, SOAP, GraphQL, OAuth2, OIDC, JWT, OpenAPI / Swagger, Open Banking (SAMA / OBL)

DevOps & Platforms: Kubernetes, OpenShift, Docker, Jenkins, GitLab CI/CD, Git

Testing & Tooling: Postman, curl, SoapUI, Chrome DevTools

Programming: JavaScript, Python, Kotlin, Swift, XSLT, GatewayScript

Cloud: AWS, Azure (fundamentals)

Methodologies: Agile / Scrum, API-First Design, Microservices

Languages: Arabic (Native), English (Professional)

Professional Experience

Ejada Systems — IT Services Provider

Riyadh, Saudi Arabia

Senior Integration Engineer

2024 – Present

- Promoted to Senior Integration Engineer in 2024 after two years of strong delivery on bank-grade integration programs; lead integration on assigned projects, mentor junior engineers, and own end-to-end API design through production rollout.
- Designed, secured, and exposed 25–50+ enterprise APIs across multiple banking and financial-services programs using IBM API Connect (v10 and v2018) and DataPower Gateway.
- Led integration delivery for **Al Rajhi Bank Open Banking** program, implementing APIs compliant with SAMA / Open Banking Lab (OBL) standards including consent management, account information, and payment initiation flows.
- Built **API Marketplace — Loyalty System** to expose Al Rajhi Bank loyalty APIs to group subsidiaries, enabling internal partners to consume rewards data through a governed, OAuth2-secured channel.
- Partnered with **Neotek** to develop and expose additional integration services for the AIS (Account Information Service) platform, extending coverage and onboarding additional consumers.
- Delivered **API Marketplace — Fast Onboarding** solution, reducing partner onboarding time through self-service developer portal and standardized OAuth2 client provisioning.
- Authored gateway policies (assembly logic, security, transformation, rate limiting) and OpenAPI / Swagger definitions for new and migrated APIs.
- Implemented OAuth2 / OIDC flows (Authorization Code, Client Credentials, Implicit) with custom security policies for client authentication and token introspection.
- Operated CI/CD pipelines (Jenkins / GitLab) to deploy API artifacts to Kubernetes / OpenShift environments across DEV, SIT, UAT, and PROD.
- Performed deep API troubleshooting using Postman, curl, and Chrome DevTools network traces; resolved issues spanning OAuth redirect flows, SSL handshakes, and gateway policy execution order.

Nokia

Saudi Arabia

R&D Trainee

Jan 2021 – May 2021

- Completed structured training across five tracks: Programming, Testing, DevOps, Version Control, and cloud fundamentals on Azure and AWS.
- Built hands-on exposure to CI/CD pipelines, Git workflows, and cloud service deployment patterns later applied in production integration work.

IR4LAB (Industrial Revolution 4 Lab)

Saudi Arabia

Full Stack & Blockchain Developer (Internship)

Aug 2018 – Sep 2018

- Completed IBM Blockchain Foundation Developer and IBM Blockchain Essentials curricula; worked with Hyperledger Composer and its Playground environment.
- Prototyped a blockchain-based certificate issuer in Python, applying smart-contract concepts to credential verification.
- Built front-end components using AngularJS and Angular 2+.

Education

King Fahd University of Petroleum and Minerals (KFUPM)

Dhahran, Saudi Arabia

Bachelor of Science in Computer Software Engineering

Aug 2014 – Aug 2019

Tuwaiq Academy — 1000 Bootcamp

Riyadh, Saudi Arabia

Android Development Bootcamp

Nov 2021 – Feb 2022

Coding Dojo — Saudi Digital Academy (SDA)

Riyadh, Saudi Arabia

Mobile Development Bootcamp (iOS & Android)

Sep 2021 – Jan 2022

Selected Personal Projects

Task Timer (Team Project)

Android / Kotlin

github.com/Haddadmj/TaskTimerApp

2021 – 2022

- Team Android app for tracking task durations; owned the timer logic (start/stop/persistence) while teammates handled UI and SQLite layer.

Shopping List, Todo, Chat Apps

iOS / Swift

github.com/Haddadmj

2021 – 2022

- Suite of iOS apps using Swift and Firebase for authentication, real-time data sync, and persistence.

Weather & Note Apps

Android / Kotlin

github.com/Haddadmj

2021

- Weather app consuming OpenWeather API; note-taking app demonstrating local persistence patterns.
